

Havells REO Switches

We challenge you to tell us about one building or a house or any other site without switches. Undoubtedly, this is a win situation for us. Locating anything like this is nearly impossible. A pioneering solution in the world of electricals, switches have made a mark since time immemorial. They are the most humble inventions that solve one of the major purposes in homes, offices and anywhere else. There is practically no gadget or household lightening product that can be completely implemented without a switch to power it. Not having switches would literally mean no or very little utilization of power. There would be no means to start the appliances, turn on the fans, lights or even power industrial tools and machines. With Havells, you will be spoilt for choice when you see the oro modular range. An exclusive range of cover frames, metal box, plastic box, sockets, switches, support & communication modules designed to outline the beauty of your homes and offices. Their metallic look and finish not only adds to the aesthetics but also make your rooms appealing.

A range of non-modular switches from Havells. A blend of robust design and sleek looks, these switches have been built to last for really long duration. The range also includes user friendly sockets, fan regulator and fuses, thus offering a complete switching solution for your home. The REO range offers the same high standards of quality and safety which is a hallmark of every Havells product.
